

# Jet Shooter

Manual Pump with Water Bag  
Backpacked Water Bag for Forest Fire

## Performance

Jet Shooter has been steadily improved for the past twenty years since it was first sold and is now widely used by the government, municipalities and forestry authorities

## Advantages

Jet Shooter can be easily operated by hand as it is lightweight and easy to handle. You can use it anywhere and particularly will find it useful where no water can be obtained.

<b>Discharging Distance</b>	Straight(S) : 15m max. 10m effective Fog (F) : 6m max. 3m effective

## Explanatory Note

**Bag** : The bag is very lightweight, strong, soft to touch and reliable in quality.

**Hand Pump** : Easy to use by hand and capable of discharging water surprisingly far, it can be manually shut off whenever desired, unlike extinguishers. The surface is chrome-plated so that it never rusts, and is almost free of maintenance.

**Nozzle (straight and spray)** : It can discharge water straight or in spray as needed by manipulating the nozzle for more effective fire fighting, which no other products can match.
